

Two of the projects we've been working with are now listed in this year's Buckminster Fuller ideas index.

MinVayu - low cost wind for the underserved

Is training village mechanics to assemble and install wind turbines, while designing a low cost turbine optimised for places with low wind.

Listing on [Idea index](#) Minvayu.org

UV Aquastar - affordable drinking water

Have a low-cost drinking water device using ultraviolet.

Listing on [Idea Index](#) .
